Belgium

overview of 2026 mandate

Belgian e-Invoicing mandate reasons and regulatory journey

Why is Belgium mandating e-Invoicing?

The approved Belgian legislation seeks to **combat VAT fraud and reduce the Belgian VAT gap**, which amounted to 4.5 billion euro (or 11%) of the total VAT total tax liability in 2022.

2019

2022

2024

2025

Law of 7 April 2019

Transposition of **Directive**2010/45/EU, requiring all EU
Pas to receive and process einvoices that comply with
the EU e-invoicing standard.

Royal Decree of 9 March 2022

Introduced the progressive
obligation for economic
operators to send EN-compliant
e-invoices to public
administrations.

Law of 6 February 2024

Approved by the Belgian
Parliament and published in the
Official Gazette, mandates B2B
e-Invoicing form 2026. Aligns
with EU initiatives under
the ViDA framework.

Federal Coalition Agreement Confirms the introduction of

near real-time reporting from 2028. These measures are consistent with the EU ViDA regulation, recently entered into force.

Belgian e-Invoicing mandate current situation and upcoming B2B requirements

B2G elnvoicing

2024

From March 2024, all suppliers of public administrations must issue e-invoices (except for contracts under €3,000), via the Peppol network or through the Mercurius platform.

Reception is mandatory for all federal and central administrations.

B2B elnvoicing

2026

From January 1st, 2026,
B2B e-invoicing will be mandatory
in a "big bang" approach using the
4-corner Peppol model.
Only structured e-invoices will be
allowed—PDFs and paper will no
longer be accepted.

Real-time reporting

2028

From January 1st, 2028, near realtime B2B domestic transaction reporting will become mandatory, based on a <u>5-corner Peppol model</u>. Peppol Access Points will electronically send specific tax data to a centralized government portal.

Belgian B2B e-Invoicing mandate transactions in scope and involved taxpayers

In-scope transactions:

Domestic B2B transactions between businesses with a Belgian VAT number, including foreign entities with a fixed establishment in Belgium, are in scope.

Structured e-invoicing is required **primarily for supplies of goods and services taking place in Belgium**, as long as they are **not VAT-exempt under Article 44** of the Belgian VAT Code.

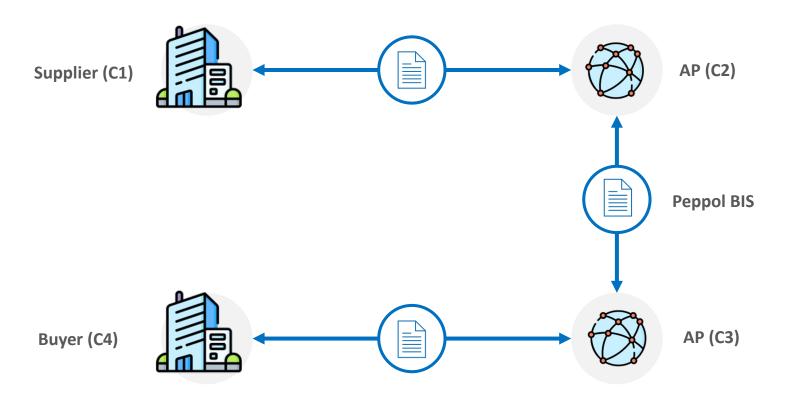

Out-of-scope transactions:

B2C transactions and **cross-border transactions** — where **at least one party lacks a Belgian VAT number or is not established in Belgium** — are excluded from the mandate.

Initially, the law of 6 February 2024 included non-established buyers in scope. However, Belgian authorities - through the Federal Coalition Agreement – recently limited the scope's mandate to domestic transactions only.

Belgian B2B e-Invoicing mandate model and requirements, from 2026

Model | 4-corner Peppol model

- Organizations must use a certified PEPPOL Access
 Point to send and receive electronic invoices.
- Access Points handle authentication and transmission of invoices, ensuring compliance with European standards.
- The PEPPOL system ensures interoperability between businesses and public administrations.

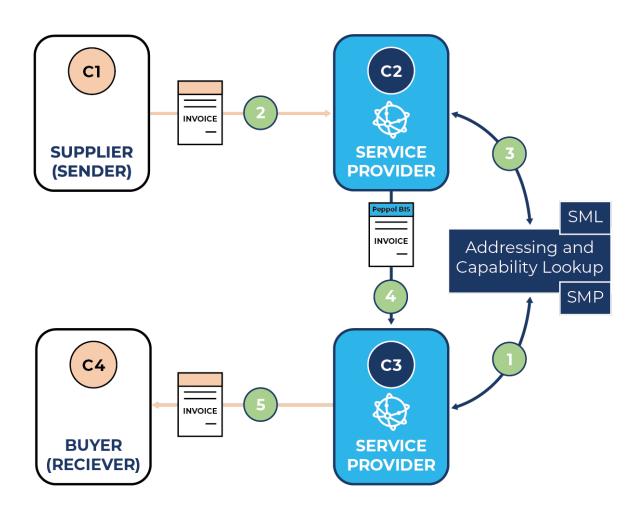

Formats | Peppol BIS 3.0, CEN compliant

Archiving 7 years

Certified Peppol Access Point (AP) and officially listed among the software solution providers approved by the Belgian Ministry of Finance.

Belgian elnvocing mandate a step back, what is Peppol

Interoperability

Peppol enables secure and interoperable exchange of business documents using a standardized, four-corner model, via certified service providers.

Access Point

A certified provider that sends/receives messages through Peppol, ensuring compliance with Peppol BIS.

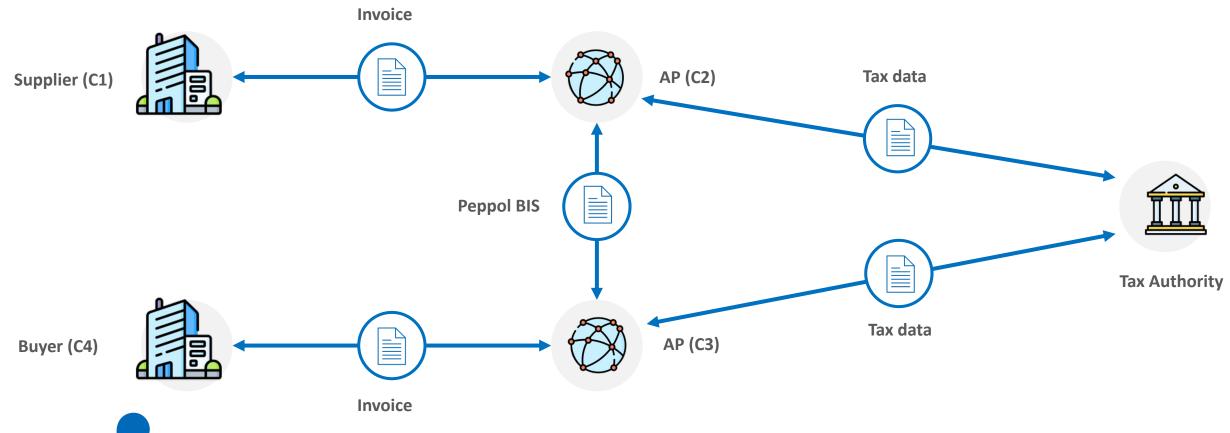

Addressing and Capability Lookup Services

Access Points find partners and capabilities via registries (SMP), located through the SML.

- Service Metadata Publisher (SMP) | Stores details
 of participant capabilities. In the four-corner
 model, SMPs help identify the receiver's service
 provider.
- Service Metadata Locator (SML) | Defines which SMP to use. It helps Aps locate metadata and addressing details for message delivery.

Belgian B2B e-Invoicing mandate ViDA compliant model and requirements, from 2028

Certified Peppol Access Point (AP) and officially listed among the software solution providers approved by the Belgian Ministry of Finance.

Our approach to compliance

Global elnvocing platform

E-INVOICING platform

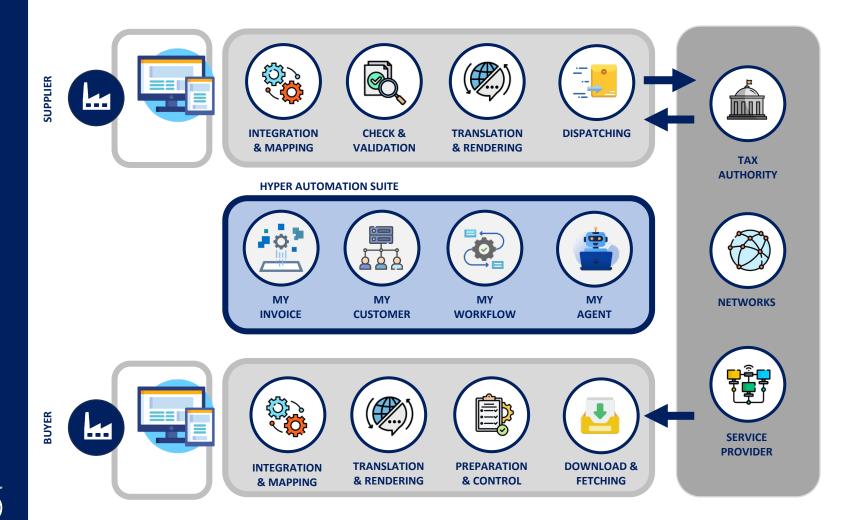

It automates and simplifies the management of the e-Invoicing cycle for businesses of all sizes, in B2G, B2B, and B2C, ensuring compliance with international regulations and seamless **integration** with enterprise systems. It can be enhanced with the **Hyper Automation Suite** for full automation of both the accounts receivable and payable cycles.
